Neurodevelopmental disorder - Wikipedia

A prominent example of a genetically determined neurodevelopmental disorder is Trisomy 21, also known as Down syndrome. This disorder usually results from an extra chromosome 21, although in uncommon instances it is related to other chromosomal abnormalities such as translocation of the genetic material. It is characterized by

short stature, epicanthal folds, abnormal fingerprints, and ...

Metabolic alkalosis - Wikipedia

Metabolic alkalosis is a metabolic condition in which the pH of tissue is elevated beyond the normal range (7.35–7.45). This is the result of decreased hydrogen ion concentration, leading to increased bicarbonate, or alternatively a direct result of increased bicarbonate concentrations.

The condition typically cannot last long if the kidneys are functioning properly.

Metabolic Encephalopathy - an overview | ScienceDirect Topics

Richard K. Olney, Michael J. Aminoff, in Neurology and General Medicine (Fourth Edition), 2008 Metabolic Encephalopathy. Metabolic encephalopathy is a diffuse but potentially reversible disorder of cerebral function that often impairs the state of arousal and cognitive function and is due to a metabolic or toxic cause. When such a metabolic disturbance develops acutely, an ...

From Stress to Inflammation and Major Depressive Disorder

Depression is among the most common and costly of all psychiatric disorders. Nearly one in four women and one in six men experience depression during their lifetime (Kessler et al., 2010), and up to 65% of individuals have recurrent episodes of the disorder (Eaton et al., 2008; Monroe & Harkness, 2011; Yiend et al., 2009). Compounding the issue is the fact that many people with ...
